Language Proficiency

- Spanish
- English intermediate

Technologies

- Html
- Css
- Sass
- Bootstrap
- Javascript
- Typescript
- Git
- Angular
- Angular Material
- NestJs
- Express Js

Tools

- Visual studio code
- Github
- Figma
- Photoshop
- MongoDB
- Docker
- Postman

Education

Udemy , Angular advance
Completed 17/10/2024 - 32.5 hours

link: https://www.udemy.com/course/angular-avanzado-fernando-herrera

certificate:https://www.udemy.com/certificate/UC-5086e0ff-cb91-43b1-9069-c0f48

Udemy , REDUX in Angular with NGRX: from the basics to practice
Completed 31/7/2024 - 12.5 hours

link: https://www.udemy.com/course/angular-fernando-herrera/

certificate:https://www.udemy.com/certificate/UC-8c303227-e433-4543-b491-fda

Udemy , Angular: from zero to expert
Completed 22/5/2024 - 45 hours

link: https://www.udemy.com/course/angular-fernando-herrera/
certificate:https://www.udemy.com/certificate/UC-8c303227-e433-4543-b491-fda

CoderHouse, Angular
11/12/2023 - 21/02/2024 - 36 hours
link: https://www.coderhouse.com/ar/online/angular
certificate:https://www.coderhouse.com/ar/certificados/660093a4d757fa2b16d75

Udemy,   Javascript: complete, practical course from scratch
Completed 20/1/2024 - 34.5 hours
link: https://www.udemy.com/course/curso-javascript-desde-cero

certificate:https://www.udemy.com/certificate/UC-d8010c94-6952-43b8-998e-0e

CoderHouse, Javascript
 5/09/2023 - 2/11/2023 - 36 hours
link: https://www.coderhouse.com/ar/online/javascript

certificate:https://www.coderhouse.com/ar/certificados/65561e91936e8e6407ad

CoderHouse, Web Development
 22/06/2023 - 24/08/2023
link: https://www.coderhouse.com/ar/online/desarrollo-web-online

certificate: https://www.coderhouse.com/ar/certificados/6502049b73048e0e4da3d

Technical School No. 3, Multimedia Technician

Period: 2012 - 2018

Technical secondary school with a focus on "Multimedia Communication Technician." Here, I acquired my first knowledge of graphic design, web development, and communication.

—

Achievements

State Management with Redux using NgRx:

● Creating and configuring the store with actions and reducers for effective

global state management.

● Developed dynamic filters to view all tasks, completed tasks, and pending

tasks.

● Implemented functionalities to edit and delete tasks, ensuring state changes are

well-controlled.

Secure Authentication Systems Development:

● Implemented authentication systems using JWT (JSON Web Tokens) for secure

user session management.

● Encrypted passwords to protect users' sensitive data.

● Used guards and computed signals (Angular v17) to maintain control of the

latest users and ensure a smooth UX.

Backend Development with Nest JS and Express JS:

● Created robust and secure APIs with NestJS and MongoDB as the database.

● Implemented Docker containers to ensure portability and consistency of the development environment.

● Used Postman for thorough API testing.

● Deployed and managed applications on Railway and Heroku, ensuring availability and scalability of the frontend and backend.

● Complex backend development in Express JS and MongoDB, implementing CRUD functions, image uploads and connection with the Google Sign-In system.

Complete CRUD App Management:

● Implemented a complete CRUD system (Create, Read, Update, Delete) for managing entries.

● Created reactive forms in Angular for efficient user data management and validation.

● Developed complete login and user registration functionalities.

Extensive Knowledge and Use of Technologies and Libraries:

● Applied Redux for effective state management in CRUD projects. ● Used UI libraries such as Tailwind, Bootstrap, NG Prime, Prime Flex, and Angular Material to create attractive and responsive interfaces, as well as illustration libraries like Undraw.

● Created templates in Figma for e-commerce projects and edited images with Photoshop to enhance the visual experience.

● Developed dynamic forms and image galleries using JavaScript, working closely with UX design to offer the best experience possible for users

Application Development Using Various APIs:

• Developed map applications using Mapbox, creating multiple functions such as allowing user location access and usage.

• Integrated APIs like CountryApp, Giphy, Pocketbase, Reqres, and MockAPI to add rich functionalities such as autocomplete, search filters, mock databases, etc.
